

International Supercomputing Conference-2015

Workshop on International Activities in
Big Data & Extreme-Scale-Computing

Opening Remarks & A Personal Perspective from a BDEC Road Warrior

Thomas Sterling
Professor and Chief Scientist

Center for Research in Extreme Scale Technologies

SCHOOL OF INFORMATICS AND COMPUTING

SCHOOL OF INFORMATICS AND COMPUTING
Bloomington

Indiana University

July 16, 2015

Expanding to Fill our Container (the Earth)

- Conventional HPC Focus and Attention (Geographical)
 - China
 - Japan
 - US
 - Europe
- Conventional HPC Focus and Attention (Domain)
 - Processors
 - Systems
 - Who owns what, produces what
 - Top end applications
 - System software and programming environments

Involvement Many-Nation HPC Community

- Latin America

- Argentina
- Chile
- Brazil
- Mexico

- Africa

- South Africa
- others

- Middle East

- Saudi Arabia
- Turkey
- Egypt

- Asia

- Thailand
- South Korea
- Philippines
- Singapore

- India

- Russia

- New Zealand

- Australia

Broadening International Engagement & Diversity

- Stimulating World-wide HPC engagement
 - Extending impact and value of HPC to broader world community
- Involvement and representation of the Many-Nation HPC community
 - Synergizing a community that is fully encompassing
- Expand domains of interest and motivations
 - Applications associated with national objectives
- Focus on cooperation, coordination, and needs
 - Computing without borders

Stimulating World-wide HPC engagement

- There is a divide between the dominant HPC nations and the far broader international community; more of a rift valley than a mountain range but nonetheless an inhibitor to cross fertilization as equal partners
- A large skill force throughout the world in HPC, in particular of the emerging next generation
- While diffuse, the aggregate resources across the more than a dozen wider-world HPC interested nations is substantial
- Many shared needs across entire wider-world

Expand Domains of Interest & Motivations

- Application domains
 - Relevancy to intra-national needs
 - Geographical, hydrological, seismological, geological, renewable energy, meteorological, and climate
 - Supporting nescient science communities
 - Industry, engineering, and manufacturing
- Data analysis and visualization
 - Societal
- Wide area network infrastructure
 - Cross country (inter institution and resource)
 - International interconnect bandwidth
- Mass data storage and archiving
- Education and training

Focus on Cooperation, Coordination & Needs

- Minimize the involvement-barrier to wider-world nations
- Extend access and engagement to multi-national cooperative initiatives
- Requires coordination initiated by leadership countries
- Embrace and benefit from interests, needs, and strengths
- Establish processes and initiatives for outreach
